Risks of Investing: International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging markets. Securities of medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods. Value securities may underperform other asset types during a given period.

Lipper Awards are granted annually to the funds in each Lipper classification that achieve the highest score for Consistent Return, a measure of funds' historical risk-adjusted returns, measured in local currency, relative to peers. Winners are selected using the Lipper Leader rating for Consistent Return for funds with at least 36 months of performance history as of 30-Nov-14. Awards are presented for the highest Lipper Leader for Consistent Return within each eligible classification over 3, 5 or 10 years.
