

Artisan Global Equity Fund

QUARTERLY Fact Sheet

Institutional Class: APHHX

As of 31 March 2022

Investment Process Highlights

The investment team seeks to invest in companies within its preferred themes with sustainable growth characteristics at attractive valuations that do not reflect their long-term potential.

Themes

- Identify long-term secular growth trends
- Invest in companies poised to be beneficiaries of those trends

Sustainable Growth

- Sustainable competitive advantage
- Superior business model
- High-quality management team

Valuation

- Assess valuation relative to growth potential and to history and peers
- Invest in companies whose sustainable growth prospects are not fully reflected in underlying stock prices

Source: Artisan Partners/MSCI. Class inception: Investor (29 March 2010); Institutional (15 October 2015). For the period prior to inception, Institutional Class performance is the Investor Class's return for that period ("Linked Performance"). Linked Performance has not been restated to reflect expenses of the Institutional Class and the share class's returns during that period would be different if such expenses were reflected.

Past performance does not guarantee and is not a reliable indicator of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. Call 800.399.1770 for current to most recent month-end performance.

Carefully consider the Fund's investment objective, risks and charges and expenses. This and other important information is contained in the Fund's prospectus and summary prospectus, which can be obtained by calling 800.399.1770. Read carefully before investing.

The value of portfolio securities selected by the investment team may rise or fall in response to company, market, economic, political, regulatory or other news, at times greater than the market or benchmark index. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging markets. Securities of small- and medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods. Growth securities may underperform other asset types during a given period.

MSCI All Country World Index measures the performance of developed and emerging markets. The index(es) are unmanaged; include net reinvested dividends; do not reflect fees or expenses; and are not available for direct investment.

Unless otherwise indicated, all information in this report includes all classes of shares, except performance and expense ratio information, and is as of the date shown in the upper right hand corner. Portfolio statistics calculations exclude outlier data and certain securities which lack applicable attributes, such as private securities. Artisan Partners may substitute information from a related security if unavailable for a particular security. Totals may not sum due to rounding.

Median is the data's midpoint value. **Market Cap** is the aggregate value of all of a company's outstanding equity securities. **Weighted Average** is the average of values weighted to the data set's composition. **Weighted Harmonic Average** is a calculation of weighted average commonly used for rates or ratios. **Price-to-Earnings Ratio (P/E Ratio)** measures how expensive a stock is. Earnings figures used for FY1 and FY2 are estimates for the current and next unreported fiscal years. **LT EPS Growth Rate** is the average of the 3-5 year forecasted EPS growth rate of a company. **Operating Margin** is a measure of profitability equal to operating income divided by revenue. **Active Share** is the percentage of a portfolio that differs from its benchmark. **Active Share** can range from 0% for an index fund to 100% for a portfolio with no overlap with an index. **Annual Turnover** is a measure of the trading activity in an investment portfolio—how often securities are bought and sold by a portfolio.
