

Artisan Floating Rate Fund

QUARTERLY Fact Sheet

Investor Class: ARTUX | Advisor Class: APDUX

As of 30 September 2022

This material must be preceded or accompanied by a current Artisan Partners Funds prospectus. [View a prospectus or summary prospectus.](#)

Investment Process Highlights

The investment team will employ a fundamental investment process to construct a high-conviction portfolio comprised primarily of floating rate debt instruments that are attractively valued, including, without limitation, floating rate leveraged loans, which could include, among other types of loans, senior secured loans, unsecured loans, second lien loans, bridge loans and junior loans. The team's aim is to invest across the credit quality spectrum in various industries and issuance sizes to construct a portfolio that can generate appealing risk-adjusted returns.

Business Quality

- Qualitative industry analysis
- Examine management decision-making history
- Consider ESG-related risk factors

Financial Strength & Flexibility

- Free cash flow analysis
- Corporate structure review
- Capital structure review

Downside Analysis

- Conservative financial projections
- Competitive dynamics
- Capital structure position
- Enterprise value support

Value Identification

- Credit improvement opportunities
- Relative value within the capital structure
- Credit cycle awareness
- Catalysts with optionality
- Dislocation exploitation

Past performance does not guarantee and is not a reliable indicator of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. The Fund's returns may vary greatly over shorter periods due to the limited operating period since inception. Call 800.344.1770 for current to most recent month-end performance. The performance information shown does not reflect the deduction of a 2% redemption fee on shares held by an investor for 90 days or less and, if reflected, the fee would reduce the performance quoted.

Portfolio Construction

A high-conviction portfolio comprised primarily of floating rate debt instruments that are attractively valued. At least 80% will be invested in floating rate leveraged loans, which could include, among other types of loans, senior secured loans, unsecured loans, second lien loans, bridge loans and junior loans. The portfolio has a bias toward US issuers but has the ability to invest globally. It also has flexibility to invest across the quality spectrum, in various industries and issuance sizes.

Team Leadership

Portfolio Managers	Years of Investment Experience
Bryan C. Krug, CFA (Lead)	22
Seth B. Yeager, CFA	18

The value of portfolio securities selected by the investment team may rise or fall in response to company, market, economic, political, regulatory or other news, at times greater than the market or benchmark index. A portfolio's environmental, social and governance ("ESG") considerations may limit the investment opportunities available and, as a result, the portfolio may forgo certain investment opportunities and underperform portfolios that do not consider ESG factors. Fixed income securities carry interest rate risk and credit risk for both the issuer and counterparty and investors may lose principal value. In general, when interest rates rise, fixed income values fall. High income securities (junk bonds) are speculative, experience greater price volatility and have a higher degree of credit and liquidity risk than bonds with a higher credit rating. The portfolio typically invests a significant portion of its assets in lower-rated high income securities (e.g., CCC). Loans carry risks including insolvency of the borrower, lending bank or other intermediary. Loans may be secured, unsecured, or not fully collateralized, trade infrequently, experience delayed settlement, and be subject to resale restrictions. Private placement and restricted securities may not be easily sold due to resale restrictions and are more difficult to value. Use of derivatives may create investment leverage and increase the likelihood of volatility and involve risks different from, or greater than, the risks associated with investing in more traditional investments, including loss in excess of the amount invested. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging markets.

Credit Suisse (CS) Leveraged Loan Index is an unmanaged market value-weighted index designed to mirror the investable universe of the US dollar-denominated leveraged loan market. New issues are added to the index on their effective date if they qualify according to the following criteria: loan facilities must be rated "BB" or lower; only fully funded term loan facilities are included; and issuers must be domiciled in developed countries. The index(es) are unmanaged; include net reinvested dividends; do not reflect fees or expenses; and are not available for direct investment.

All information in this report includes all classes of shares, except performance and expense ratio information and as otherwise indicated, and is as of the date shown in the upper right hand corner unless otherwise indicated. Portfolio statistics calculations exclude outlier data and certain securities which lack applicable attributes, such as private securities. Artisan Partners may substitute information from a related security if unavailable for a particular security. Portfolio statistics include accrued interest unless otherwise stated and may vary from the official books and records of the Fund. Totals may not sum due to rounding.

This material is provided for informational purposes without regard to your particular investment needs and shall not be construed as investment or tax advice on which you may rely for your investment decisions. Investors should consult their financial and tax adviser before making investments in order to determine the appropriateness of any investment product discussed herein.

Sector exposure percentages reflect sector designations as currently classified by ICE BofA.

30-Day SEC Yield is based on a formula specified by the SEC that calculates a fund's hypothetical annualized income, as a percentage of its assets. The unsubsidized yield excludes the effect of fee waivers. This hypothetical yield will differ from the fund's actual experience and as a result, income distributions from the fund may be higher or lower. **Credit Quality** ratings are from S&P and/or Moody's. Ratings typically range from AAA (highest) to D (lowest) and are subject to change. The ratings apply to underlying holdings of the portfolio and not the portfolio itself. If securities are rated by both agencies, the higher rating was used. Securities not rated by S&P or Moody's are categorized as Unrated/Not Rated. **Free Cash Flow** is a measure of financial performance calculated as operating cash flow minus capital expenditures. **Coupon** is the annual interest rate paid by a fixed income security, expressed as a percentage of the face value. **Current Yield** is the annual income (interest or dividends) divided by the current price of a security. **Duration** estimates the sensitivity of underlying fixed income securities to changes in interest rates—the longer the duration, the greater the sensitivity to changes in interest rates. **Average Price** is the aggregate market value of the fixed income securities in the portfolio. **Yield to maturity (YTM)** is the total return anticipated on a bond if the bond is held until it matures.

Artisan Partners Funds offered through Artisan Partners Distributors LLC (APDLLC), member FINRA. APDLLC is a wholly owned broker/dealer subsidiary of Artisan Partners Holdings LP. Artisan Partners Limited Partnership, an investment advisory firm and adviser to Artisan Partners Funds, is wholly owned by Artisan Partners Holdings LP.
