Source: Artisan Partners/MSCI/Russell/ICE BofA/S&P/Credit Suisse. Returns for periods less than one year are not annualized. \*Closed to most new investors. For eligibility criteria, refer to the "Who is Eligible to Invest in a Closed Fund?" section of the prospectus. <sup>1</sup>Value-added is based on the Fund's since inception return minus the since inception return of the Fund's benchmark. <sup>2</sup>For the period prior to inception, Advisor Class performance is the Investor Class' return for that period ("Linked Performance"). Linked Performance has not been restated to reflect expenses of the Advisor Class and each share's respective returns during that period would be different if such expenses were reflected. <sup>3</sup>AUM include approximately \$78 million (reported on a one-month lag) for which Artisan Partners provides investment models to managed account sponsors. <sup>4</sup>As of 30 Sep 2022. See prospectus for further details. <sup>5</sup>Includes estimated expenses for the current fiscal year. <sup>6</sup>Gross/Net. Reflects a contractual expense limitation agreement in effect through 31 Jan 2025.

Past performance does not guarantee and is not a reliable indicator of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. Call 800.344.1770 for current to most recent month-end performance. Performance may reflect agreements to limit a Fund's expenses, which would reduce performance if not in effect. Deduction of redemption fees (if applicable) are not reflected; if assessed, redemption fees would reduce performance. The Artisan Focus Fund's investments in initial public offerings (IPOs) made a material contribution to performance. IPO investments may contribute significantly to a small portfolio's return, an effect that will generally decrease as assets grow. IPO investments may be unavailable in the future. Unlike the Index, the Artisan High Income Fund may hold loans and other security types. At times, this causes material differences in relative performance. The Artisan Value Income, Artisan High Income, Artisan Floating Rate, Artisan Global Unconstrained and Artisan Emerging Markets Debt Opportunities Funds' performance information shown does not reflect the deduction of a 2% redemption fee on shares held by an investor for 90 days or less and, if reflected, the fee would reduce the performance quoted.

Carefully consider the Fund's investment objective, risks and charges and expenses. This and other important information is contained in the Fund's prospectus and summary prospectus, which can be obtained by calling 800.344.1770. Read carefully before investing.

**Risks of Investing:** Current and future portfolio holdings are subject to risk. Current and future portfolio holdings are subject to risk. The value of portfolio securities selected by the investment team may rise or fall in response to company, market, economic, political, regulatory or other news, at times greater than the market or benchmark index. A portfolio's environmental, social and governance ("ESG") considerations may limit the investment opportunities available and, as a result, the portfolio may forgo certain investment opportunities and underperform portfolios that do not consider ESG factors. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging and less developed markets, including frontier markets. Such risks include new and rapidly changing political and economic structures, which may cause instability; underdeveloped securities markets; and higher likelihood of high levels of inflation, deflation or currency devaluations. Securities of small- and medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods. Growth and value securities may underperform other asset types during a given period. Fixed income securities carry interest rate risk and credit risk. In general, when interest rates rise, fixed income fund values fall and investors may lose principal value. High yield securities (junk bonds) are fixed income instruments rated below investment grade. High income securities are speculative, have a higher degree of default risk than higher-rated bonds and may increase the Fund's volatility. Non-diversified portfolios may invest larger portions of assets in securities of a smaller number of issuers and performance of a single issuer may have a greater impact to the portfolio's returns.
