Investment Process Highlights

The team applies in-depth fundamental research and employs robust operational capabilities across a broad opportunity set to uncover knowledge gaps in global markets. By exploiting knowledge gaps, the team is well positioned to discover idiosyncratic opportunities that provide compelling risk-adjusted return potential.

Organizational Structure

- Flat and collaborative structure
- Portfolio managers and analysts focus on idea generation
- Trading and implementation are embedded within the investment team

Idea Generation Through Broad Investment Universe

- Constantly perform fundamental country research and monitor financial markets
- Country research seeks to understand policy environment and how important policy moments may alter the investment environment
- Corporate analysis includes decomposing yields and examining corporate liquidity and solvency risks
- Integrated environmental, social and governance (ESG) analysis at the country and corporate levels
- Broad spectrum of global markets with investable assets from more than 100 countries across asset classes

Portfolio Implementation

- Investment opportunities analyzed from a risk factor perspective—the forces that drive securities and instruments prices
- Investment team and trading consider which instruments provide optimal risk-adjusted return
- Trading and implementation expands the investment universe by understanding and overcoming investment barriers

Past performance does not predict future returns. Performance is NAV to NAV, including reinvestment of dividends and capital gains, if any, and is net of fees and expenses, excluding any subscription or redemption charges which may be levied. At the moment, the Fund does not intend to charge subscription or redemption fees. The Fund may be offered in different share classes, which are subject to different fees, expenses and inception dates (which may affect performance), have different minimum investment requirements and are entitled to different services. Funds are actively managed and are not managed to a benchmark index.

Investment Risks: Investments will rise and fall with market fluctuations and investor capital is at risk. Investors investing in funds denominated in non-local currency should be aware of the risk of currency exchange fluctuations that may cause a loss of principal. These risks, among others, are further described on the next page, which should be read in conjunction with this material.

Current and future portfolio holdings are subject to risk. Non-diversified portfolios may invest larger portions of assets in securities of a smaller number of issuers and performance of a single issuer may have a greater impact to the portfolio's returns. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging and less developed markets, including frontier markets, and include new and rapidly changing political and economic structures, which may cause instability; underdeveloped securities markets; and higher likelihood of high levels of inflation, deflation or currency devaluations. Fixed income securities carry interest rate risk and credit risk for both the issuer and counterparty and investors may lose principal value. In general, when interest rates rise, fixed income values fall. High yield securities (junk bonds) are speculative, experience greater price volatility and have a higher degree of credit and liquidity risk than bonds with a higher credit rating. Use of derivatives may create investment leverage and increase the likelihood of volatility and involve risks different from, or greater than, the risks associated with investing in more traditional investments, including loss in excess of the amount invested. Investments will rise and fall with market fluctuations and investor capital is at risk. The costs associated with this fund will impact your return over time. These risks, among others, are further described in the Fund Documents.

This is a marketing communication. Further fund details, including risks, fees and expenses, and other information, such as ESG practices, are set out in the current Prospectus, Supplements, Key Investor Information Documents (KIID) and other documentation (collectively, the Fund Documents), which can be obtained by calling +44 (0) 207 766 7130 or visiting www.apgfunds-docs.com. Please refer to the Fund Documents and consider all of a fund's characteristics before making any final investment decisions.

The portfolio exposures presented exclude US Treasuries, US dollars and euros and US dollar/euro-denominated derivatives and cash equivalents, unless otherwise noted. In aggregate, these instruments make up a material portion of the portfolio's exposures and may be impactful to the portfolio's return, but are typically utilized for liquidity management and reflect negative exposures due to currency offsets when funding positions in emerging markets. Hard currencies are defined by the investment team to include currencies of developed market countries, including US dollars, euros, British pounds and Japanese yen, among others.

Unless otherwise indicated, the portfolio data and performance source is Artisan Partners/Blackrock and information is as of the date shown in the upper right hand corner and is subject to change. Where applicable, portfolio statistics include accrued interest, and exposure percentages are based on a representative portfolio's total net assets. Totals may not sum to 100% due to rounding, derivative exposures, unsettled transactions and other factors.

Notional value represents the portfolio's exposures based on the economic value of investments by adjusting for derivatives exposure to the market value of the contract's underlying security and accounts for the sensitivity to changes in price of the underlying security. In comparison, measuring the exposure of a derivative contract at market value or notional value can understate or overstate, respectively, the economic exposure and risk. This estimate of portfolio exposure is only an approximation of the portfolio at a point in time.

Portfolio holdings are displayed in the context of marketing the fund shares and not the marketing of underlying portfolio securities. Securities referenced may not be representative of all portfolio holdings. Securities of the same issuer are aggregated to determine a holding's portfolio weight. Portfolio statistics calculations exclude outlier data and certain securities which lack applicable attributes, such as private securities. Artisan Partners may substitute information from a related security if unavailable for a particular security. This material is as of the date indicated and is subject to change without notice. Totals may not sum due to rounding.

Options-Adjusted Spread (OAS) measures the portfolio's yield spread for fixed income securities relative to a benchmark, typically a treasury yield curve, adjusted to account for embedded options. **Effective Duration (option-adjusted duration)** measures the portfolio's sensitivity of the price (the value of principal) of fixed income securities to changes in interest rates, adjusted to account for embedded options. **Spread Duration** measures a portfolio's sensitivity to price movements (the value of principal) for fixed income securities relative to changes in each security's credit spread (yield difference between a benchmark, typically a treasury yield curve). **IG/HY/Not Rated Composition** is the portfolio's proportion of investment grade (IG), below investment grade (high yield; HY) bonds, based on credit ratings determined by surveying the three major ratings agencies (Moody's, S&P, Fitch) and taking the middle of the three ratings or the lower if only two ratings are available, and unrated securities within the portfolio. **Yield to Worst (YTW)** is the portfolio's weighted-average lowest potential yield that can be received on a bond without the issuer actually defaulting.
