

# Artisan Global Discovery Strategy

A Best Ideas, Global Growth Portfolio

PORTFOLIO MANAGER  
Viewpoints

June 2024

Structured to capitalize on the Artisan Partners Growth Team’s 20-plus years’ experience of growth investing, the Artisan Global Discovery Strategy is a highly flexible portfolio of companies representing some of the team’s best ideas across the global economy. Some key attributes of the strategy include:

## Unconstrained Market Cap and Geographic Mandates

Absent an upper limit on the strategy’s market-cap mandate, the team can stick with its global investment campaigns through their profit cycles.

## Opportunistically Targeting Initial Investments in Global Mid- and Small-Cap Franchises

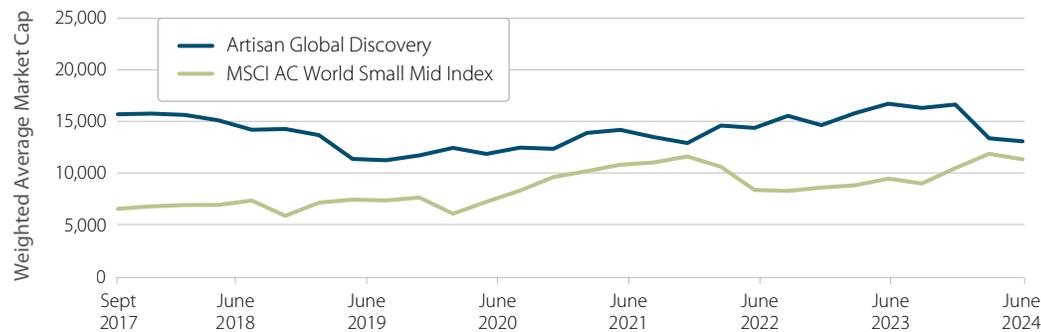

The strategy’s initial investments have historically been in mid- and small-cap companies (Exhibit 1), in-line with the MSCI AC World SMID Index. The team has found mid-cap stocks represent a compelling intersection of quality and growth—mature enough to be high-quality franchises with solid competitive advantages, financially sound with the capacity to generate cash flow to fund future growth, a tendency to be a purer profit cycle play given a tighter business focus and in possession of experienced, savvy management teams. That said, these features can be found up and down the market-cap spectrum, and the Global Discovery strategy possesses the flexibility to identify these global profit cycle opportunities without being inhibited by company size.

Jason L. White, CFA  
Portfolio Manager

24 Years Investment Experience

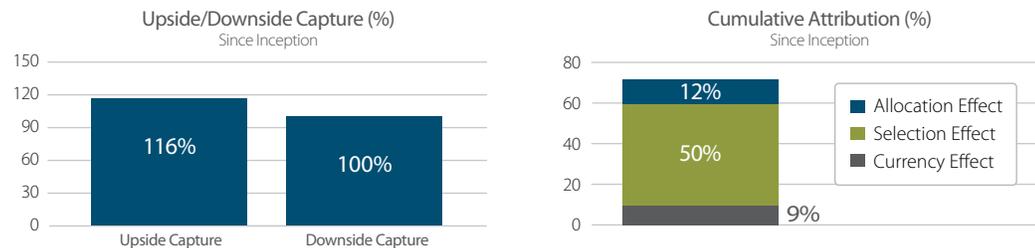

Exhibit 1: Artisan Global Discovery Strategy Market Cap at Time of Purchase (\$ in millions)

Sources: FactSet/MSCI. As of 30 Jun 2024. Artisan Global Discovery Strategy ATOP represents the weighted average market cap for all the holdings in a representative portfolio within the Artisan Global Discovery Composite at their initial purchase dates. Inception of the representative portfolio was 21 Aug 2017.

## Outperformance in Up and Down Markets Driven by Stock Selection

Exhibit 2: The Growth team’s bottom-up oriented investment process has been a key ingredient in the strategy’s relative outperformance.

Source: Artisan Partners/FactSet/MSCI. Benchmark: MSCI All Country World Small Mid Index. As of 30 Jun 2024. Attribution is based on a representative account since the inception of the Composite on 1 Sep 2017 through 30 Jun 2023. An upside capture ratio over 100 indicates that a portfolio has outperformed the index during months when the Index is positive. A downside capture ratio of less than 100 indicates that a portfolio has lost less than the index during months when the Index is negative. Refer to disclosures for additional information on attribution. Past performance does not guarantee future results and represents net of fees performance for the composite.

**Investment Risks:** Investments will rise and fall with market fluctuations and investor capital is at risk. Investors investing in strategies denominated in non-local currency should be aware of the risk of currency exchange fluctuations that may cause a loss of principal. These risks, among others, are further described on the next page, which should be read in conjunction with this material.

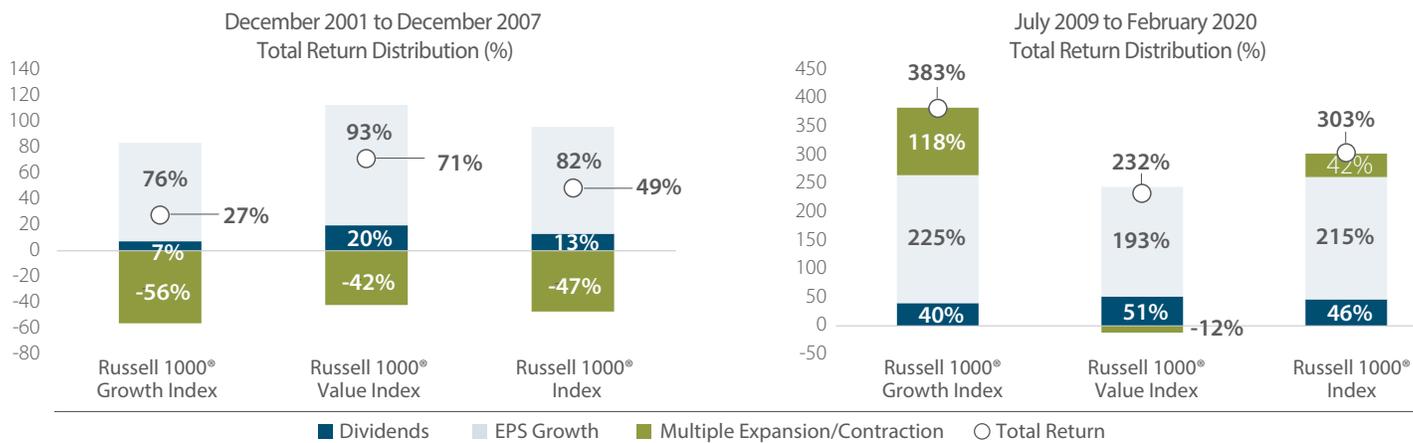

## A Time-Tested Approach to Growth Investing

The team fundamentally believes stocks follow profits and identifying high-quality franchises (low cost production capability, dominant market position, possession of a proprietary asset or a defensible brand name) on the cusp of a compelling profit cycle, based on catalysts the team can understand, selling at a discount to the team's estimate of private market value is a highly effective way to compound assets over the long term. The strategy capitalizes on the team's 10+ years' experience investing in companies worldwide and 20+ years' experience in mid-cap growth investing.

## Picking Stocks on the Premise of Profit Growth—A Core Belief of The Team—Has Historically Been an Effective Strategy

Data show profit growth has been the predominant reason for value, or cyclical, stocks' outperformance in the 2000s and the rotation into growth stocks in the post-global financial crisis decade. We explore this concept more in our post on [artisancanvas.com](https://www.artisancanvas.com), The Importance of Profit Growth in Equity Returns.

**Exhibit 3: Dividend, EPS Growth and Multiple Expansion/Contraction Contribution to Total Return**

Sources: FactSet/Russell, Artisan Partners. Economic expansions are defined as the periods between the end date and start date of recessions. The two expansions occurred between 12/3/2001 to 12/31/2007 and 7/1/2009 to 2/29/2020 per FactSet. EPS growth is based on FY1 EPS during each respective period. Past performance does not guarantee future results.

## A Unique, Differentiated Portfolio

A combined global focus and unconstrained nature differentiate the Global Discovery Strategy from the Artisan U.S. Mid-Cap Growth, Artisan Global Opportunities and Artisan U.S. Small-Cap Growth Strategies managed by the team. As of 30 June 2023, the strategy's top-10 contributors since inception are unique relative to its benchmark's top-10 contributors.

## Investment Results

(% USD) as of 30 Jun 2024	QTD	YTD	Average Annual Total Returns				Inception
			1Yr	3Yr	5Yr	10 Yr	
Composite — Gross	-2.82	5.89	13.37	-1.26	11.04	—	12.88
Composite — Net	-3.06	5.39	12.29	-2.21	9.98	—	11.80
MSCI All Country World Small Mid Index	-2.06	2.83	10.71	-0.34	7.06	—	6.43

Annual Returns (% USD) Trailing 12 months ended 30 Jun	2020	2021	2022	2023	2024
Composite — Net	23.17	39.78	-27.43	14.75	12.29

Source: Artisan Partners/MSCI. Returns for periods less than one year are not annualized. Composite inception: 1 Sep 2017.

**Past performance does not guarantee and is not a reliable indicator of future results. Current performance may be lower or higher than the performance shown. Composite performance has been presented in both gross and net of investment management fees.**

**Investment Risk:** Investments will rise and fall with market fluctuations and investor capital is at risk. Investors investing in investment vehicles denominated in non-local currency should be aware of the risk of currency exchange fluctuations that may cause a loss of principal. These risks, among others, are further described in the Important Disclosures section which should be read in conjunction with this material.

International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging and less developed markets, including frontier markets. Securities of small- and medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods. Growth securities may underperform other asset types during a given period. Investments will rise and fall with market fluctuations and investor capital is at risk. Investors investing in strategies denominated in non-local currency should be aware of the risk of currency exchange fluctuations that may cause a loss of principal. These risks, among others, are further described in Artisan Partners Form ADV, which is available upon request.

Unless otherwise indicated, the Artisan Strategy characteristics relate to that of an investment composite or a representative account managed within a composite. It is intended to provide a general illustration of the investment strategy and considerations used by Artisan Partners in managing that strategy. Individual accounts may differ, at times significantly, from the reference data shown due to varying account restrictions, fees and expenses, and since-inception time periods, among others. Where applicable, this information is supplemental to, and not to be construed with, a current or prospective client's investment account information. This material is provided for informational purposes without regard to your particular investment needs. This material shall not be construed as investment or tax advice on which you may rely for your investment decisions. Investors should consult their financial and tax adviser before making investments in order to determine the appropriateness of any investment product discussed herein.

Source: Artisan Partners/FactSet/MSCI. Attribution quantifies the relationship between a portfolio's relative returns and the active management decisions differentiating the portfolio from the benchmark. Allocation Effect examines the relative return attributable to group (e.g., asset class, sector, region) allocations. Selection Effect examines the relative return attributable to security selections. For international portfolios, Currency Effect examines the relative return attributable to currency exposures. Contribution to Return is calculated by multiplying a security's portfolio weight by its in-portfolio return for the period. Securities of the same issuer are aggregated to determine the weight in the portfolio; aggregation of corporate affiliates is subject to the determination of Artisan Partners. Attribution and Contribution to Return are not exact, but should be considered an approximation of the relative contribution from factors considered. The analysis of relative returns is not representative of portfolio returns due to several variables (e.g., fees, expenses transactions) and therefore should be examined in conjunction with the portfolio's actual returns for the period. Further information on the methodology used is available upon request. Securities not classified by MSCI reflect country designations as of the date the report was generated. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used to create indices or financial products. This report is not approved or produced by MSCI.

Frank Russell Company ("Russell") is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Frank Russell Company. No further distribution of Russell Data is permitted without Russell's express written consent. Russell does not promote, sponsor or endorse the content of this communication. The index(es) are unmanaged; include net reinvested dividends; do not reflect fees or expenses; and are not available for direct investment.

Net-of-fees composite returns were calculated using the highest model investment advisory fees applicable to portfolios within the composite. Fees may be higher for certain pooled vehicles and the composite may include accounts with performance-based fees. All performance results are net of commissions and transaction costs, and have been presented gross and net of investment advisory fees. Dividend income is recorded net of foreign withholding taxes on ex-dividend date or as soon after the ex-dividend date as the information becomes available to Artisan Partners. Interest income is recorded on the accrual basis. Performance results for the Index include reinvested dividends and are presented net of foreign withholding taxes but, unlike the portfolio's returns, do not reflect the payment of sales commissions or other expenses incurred in the purchase or sale of the securities included in the indices.

Portfolio statistics are intended to provide a general view of the entire portfolio, or Index, at a certain point in time. Statistics are calculated using information obtained from various data sources. Artisan Partners excludes outliers when calculating portfolio characteristics. If information is unavailable for a particular security Artisan Partners may use data from a related security to calculate portfolio statistics. Private Market Value is an estimate of the value of a company if divisions were each independent and established their own market stock prices.
