Investment Process Highlights

Artisan Partners Global Value Team seeks to invest in high-quality, undervalued companies with strong balance sheets and shareholder-oriented management teams.

- **Undervaluation**—Determining the intrinsic value of a business is the heart of the team's research process. Intrinsic value represents the amount that a buyer would pay to own a company's future cash flows. We seek to invest at a significant discount to our estimate of the intrinsic value of a business.
- **Business Quality**—The team seeks to invest in companies with histories of generating strong free cash flow, improving returns on capital and strong competitive positions in their industries.
- **Financial Strength**—The Global Value team believes investing in companies with strong balance sheets helps reduce the potential for capital risk and provides company management the ability to build value when attractive opportunities are available.
- **Shareholder-Oriented Management**—The team's research process attempts to identify management teams with a history of building value for shareholders.

"The Select Equity Strategy is a natural extension of our team's philosophy and process. We are excited to offer this focused, differentiated product that leverages our extensive, existing global research platform."

– Dan O'Keefe

A non-diversified portfolio may invest a larger portion of assets in securities of a smaller number of issuers and performance of a single issuer may affect overall portfolio performance greater than in a diversified portfolio. Securities of small- and medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods. Value or growth securities may underperform other asset types during a given period.

For the purpose of determining the Fund's holdings, securities of the same issuer are aggregated to determine the weight in the Fund. The discussion of portfolio holdings does not constitute a recommendation of any individual security.
