Commentary

The MSCI AC World Index delivered a solid 6.7% Q4 gain and a 18.5% return for 2021. Q3 corporate earnings came in ahead of expectations (42% YOY growth vs. 34% expected) and generally proved resilient to ongoing supply chain disruptions. Fed Chair Powell capitulated on his “transitory” inflation classification and expects to end asset purchases by March (vs. mid-2022 previously). Interest rates are expected to rise sooner than previously expected—57% probability for liftoff in March. Late in the quarter, the more transmissible omicron COVID-19 variant sent cases in the US to record highs, though the market doesn’t appear to anticipate the same economic consequences experienced earlier in the pandemic.

Our portfolio trailed the MSCI AC World Index in Q4. Among our bottom contributors were Magazine Luiza and Vestas Wind Systems. Magazine Luiza is a Brazilian retailer transforming itself from brick-and-mortar to a leader in e-commerce. Shares have been pressured as investors weigh competitive threats. We are monitoring the situation closely, and we believe Magazine Luiza’s highest quality, lowest cost logistics service could allow it to be a dominant player in a large, lowly penetrated Brazilian e-commerce market. Meanwhile, it is a small GardenSM position.

Vestas’ margins have been hampered by supply chain instability, rising energy prices and cost inflation from raw materials, transport, and turbine components. We believe several of these headwinds will prove transitory longer term, and the company remains well positioned to disproportionately benefit from the global power grid transition to more renewable sources.

Among our top contributors were Advanced Micro Devices and Lowe’s. Advanced Micro Devices (AMD) is executing well across its product portfolio and expects the momentum to continue. With a strong product pipeline, we believe there is meaningful runway ahead for AMD to make further market share gains and close its margin gap with peers.

Lowe’s is a leading US homebuilding and repair supplier. The company recently reported a solid quarter, effectively managing rising input cost pressures and proving more resilient than the Street had been anticipating against difficult YOY growth comparisons. Our turnaround thesis—improve the in-store experience, upgrade technology—is firmly in motion, and we believe the profit cycle ahead is compelling.

Carefully consider the Fund's investment objective, risks and charges and expenses. This and other important information is contained in the Fund's prospectus and summary prospectus, which can be obtained by calling 800.344.1770. Read carefully before investing.

Current and future portfolio holdings are subject to risk. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging markets. Securities of small- and medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods. Growth securities may underperform other asset types during a given period.

MSCI All Country World Index measures the performance of developed and emerging markets. The index(es) are unmanaged; include net reinvested dividends; do not reflect fees or expenses; and are not available for direct investment.

For the purpose of determining the Fund's holdings, securities of the same issuer are aggregated to determine the weight in the Fund. The discussion of portfolio holdings does not constitute a recommendation of any individual security. These holdings comprise the following percentages of the Fund's total net assets as of 31 Dec 2021: Lowe's Cos Inc 2.6%; Magazine Luiza SA 0.5%; Vestas Wind Systems A/S 0.9%. Securities named in the Commentary, but not listed as a Top Ten Holding or not listed here are not held in the Fund as of the date of this report. The portfolio managers' views and portfolio holdings are subject to change and the Fund disclaims any obligation to advise investors of such changes.

Unless otherwise indicated, all information in this report includes all classes of shares, except performance and expense ratio information, and is as of the date shown in the upper right hand corner. Totals may not sum due to rounding.

Country exposure percentages reflect country designations as classified by MSCI as of the date shown. Securities not classified by MSCI reflect country designations as of the date the report was generated. Sector exposure percentages reflect sector designations as currently classified by GICS.

Our capital allocation process is designed to build position size according to our conviction. Portfolio holdings develop through three stages: GardenSM, CropSM and HarvestSM. GardenSM investments are situations where we believe we are right, but there is not clear evidence that the profit cycle has taken hold, so positions are small. CropSM investments are holdings where we have gained conviction in the company's profit cycle, so positions are larger. HarvestSM investments are holdings that have exceeded our estimate of intrinsic value or holdings where there is a deceleration in the company's profit cycle. HarvestSM investments are generally being reduced or sold from the portfolios.
