

# Artisan International Explorer Fund

MONTHLY  
Commentary

Advisor Class: ARDBX

As of 31 July 2022

## Investment Process Highlights

The investment team seeks to invest in high-quality, undervalued businesses that offer the potential for superior risk/reward outcomes. The investment universe is generally non-US equities with market caps below \$5 billion.

### Undervaluation

- Determine the intrinsic value of the business
- Invest at a significant discount to intrinsic value

### Business Quality

- Strong free cash flow
- High/improving returns on capital
- Strong competitive positions

### Financial Strength

- Strong balance sheets reduce potential for capital risk
- Provides management ability to build value

### Shareholder Oriented Management

- History of building shareholder value

Past performance does not guarantee and is not a reliable indicator of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. The Fund's returns may vary greatly over shorter periods due to the limited operating period since inception. Call 800.344.1770 for current to most recent month-end performance.

### Co-Portfolio Managers

Beini Zhou, CFA	17
Anand Vasagiri	17
<b>Managing Director</b>	
N. David Samra	29

Carefully consider the Fund's investment objective, risks and charges and expenses. This and other important information is contained in the Fund's prospectus and summary prospectus, which can be obtained by calling 800.344.1770. Read carefully before investing.

Current and future portfolio holdings are subject to risk. The value of portfolio securities selected by the investment team may rise or fall in response to company, market, economic, political, regulatory or other news, at times greater than the market or benchmark index. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging markets. Such risks include new and rapidly changing political and economic structures, which may cause instability; underdeveloped securities markets; and higher likelihood of high levels of inflation, deflation or currency devaluations. Securities of small- and medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods. Value securities may underperform other asset types during a given period.

MSCI All Country World ex USA Small Cap Index measures the performance of small-cap companies in developed markets and emerging markets excluding the US. The index(es) are unmanaged; include net reinvested dividends; do not reflect fees or expenses; and are not available for direct investment.

For the purpose of determining the Fund's holdings, securities of the same issuer are aggregated to determine the weight in the Fund. The discussion of portfolio holdings does not constitute a recommendation of any individual security. The portfolio managers' views and portfolio holdings are subject to change and the Fund disclaims any obligation to advise investors of such changes.

Unless otherwise indicated, all information in this report includes all classes of shares, except performance and expense ratio information, and is as of the date shown in the upper right hand corner. Totals may not sum due to rounding.
