Investment Process

- The team uses thematic idea generation to identify inflections in multi-year trends in which we have differentiated views on industry fundamentals
- Our systematic analytical framework allows for deep, bottom-up fundamental analysis across themes, subsectors, and securities, creating a repeatable and methodical decision-making process
- We apply proactive risk management throughout our portfolio construction process in effort to consistently provide attractive risk-adjusted returns while mitigating volatility to compound capital over the long term

Past performance does not guarantee and is not a reliable indicator of future results. Current performance may be lower or higher than the performance shown. Composite performance has been presented in both gross and net of investment management fees. The strategy's investments in initial public offerings (IPOs) made a material contribution to performance. IPO investments may contribute significantly to a small portfolio's return, an effect that will generally decrease as assets grow. IPO investments may be unavailable in the future.

Portfolio Manager: Chris Smith

Chris Smith is a managing director of Artisan Partners and founding portfolio manager of the Artisan Partners Thematic Team. Prior to joining Artisan Partners in October 2016, Mr. Smith was a senior analyst at Kingdon Capital Management where he managed capital directly for Mark Kingdon. Mr. Smith spent the majority of his career at Karsch Capital Management where he was a managing director and a senior analyst covering the consumer, media and industrial sectors. Upon Karsch Capital closing in August 2013, Mr. Smith was selected by Michael Karsch to create and exclusively manage Centerline Investment Partners, a long-only fund with more than \$100 million in assets, which he then merged into Kingdon Capital with the client's approval. Mr. Smith has also worked at Soros Fund Management, as well as UBS and Credit Suisse in equity research. He holds a bachelor's degree in finance from the Wharton School, University of Pennsylvania (summa cum laude).

Our strong performance is a reflection of our disciplined process, focused portfolio construction and proactive risk management.

— Chris Smith, Portfolio Manager

Team Highlights

- In addition to Chris, the team is comprised of a dedicated staff of 8 investment and 4 business development professionals.
- The investment team has cumulative industry experience of over 100 years, and has successfully managed portfolios across multiple market cycles.
- The team is supported by Artisan's infrastructure, which provides the access and operational support of a large asset management firm, allowing us to focus on investing capital.
- Our process blends a collaborative team mentality with individual accountability.

Investment Risks: A non-diversified portfolio may invest a larger portion of assets in securities of a smaller number of issuers and performance of a single issuer may affect overall portfolio performance greater than in a diversified portfolio. The portfolio's use of derivative instruments may create additional leverage and involve risks different from, or greater than, the risks associated with investing in more traditional investments. High portfolio turnover may adversely affect returns due to increased transaction costs and creation of additional tax consequences. Securities of small- and medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging markets. Investors investing in strategies denominated in non-local currency should be aware of the risk of currency exchange fluctuations that may cause a loss of principal. These risks, among others, are further described in Artisan Partners Form ADV, which is available upon request.

Unless otherwise indicated, the Artisan Strategy characteristics relate to that of an investment composite or a representative account managed within a composite. It is intended to provide a general illustration of the investment strategy and considerations used by Artisan Partners in managing that strategy. Individual accounts may differ, at times significantly, from the reference data shown due to varying account restrictions, fees and expenses, and since-inception time periods, among others. Where applicable, this information is supplemental to, and not to be construed with, a current or prospective client's investment account information. This material is provided for informational purposes without regard to your particular investment needs. This material shall not be construed as investment or tax advice on which you may rely for your investment decisions. Investors should consult their financial and tax adviser before making investments in order to determine the appropriateness of any investment product discussed herein. We expressly confirm that neither Artisan Partners nor its affiliates have made or are making an investment recommendation, or have provided or are providing investment advice of any kind whatsoever (whether impartial or otherwise), in connection with any decision to hire Artisan Partners as an investment adviser, invest in or remain invested in any funds to which we serve as investment adviser or otherwise engage with Artisan Partners in a business relationship.

Net-of-fees composite returns were calculated using the highest model investment advisory fees applicable to portfolios within the composite. Fees may be higher for certain pooled vehicles and the composite may include accounts with performance-based fees. All performance results are net of commissions and transaction costs, and have been presented gross and net of investment advisory fees. Dividend income is recorded net of foreign withholding taxes on ex-dividend date or as soon after the ex-dividend date as the information becomes available to Artisan Partners. Interest income is recorded on the accrual basis. Performance results for the Index include reinvested dividends and are presented net of foreign withholding taxes but, unlike the portfolio's returns, do not reflect the payment of sales commissions or other expenses incurred in the purchase or sale of the securities included in the indices.

Alpha measures the performance of an investment portfolio against a market index. **Sharpe Ratio** is a measure of risk-adjusted return—it is the average return earned in excess of the risk-free rate per unit of volatility or total risk. The risk free rate is the US 3-month Treasury Bill. **Upside/Downside Capture** based on monthly returns and represents average monthly returns during months when the index was positive and negative, respectively. **Active Share** is defined as the percentage of a portfolio that differs from its benchmark index.
