

### Investment Process

Our investment approach is based on thematic idea generation, a systematic framework for analyzing companies and proactive risk management. Utilizing this approach, we seek to construct a focused portfolio designed to maximize alpha while limiting downside risk over the long term.

#### Thematic Idea Generation

We believe a key element in alpha generation is finding areas where our views on industry fundamentals differ from consensus estimates. In this pursuit, we seek to identify inflections in multi-year trends which may be caused by changes in supply/demand dynamics, societal behavior, market conditions, technology, laws/regulations and business models, among other variables. We believe these inflections are often misunderstood by market participants, and can lead to powerful re-ratings of industries and companies. Identifying themes helps us develop a focused universe of companies to analyze more thoroughly.

#### Systematic Analytical Framework

We apply a systematic framework for analyzing companies across sectors and themes, creating a repeatable and methodical decision-making process. Our proprietary company models focus on multi-year earnings power differentiation, expected outcome scenario analysis, return on invested capital and discounted cash flow valuations. Visual outputs are then produced through our internally developed technology solutions, allowing us to consistently evaluate positions across the portfolio.

#### Proactive Risk Management

We incorporate risk management into all stages of our investment process. Metrics evaluated include crowding, correlation, volatility, stress tests, liquidity, factor analysis and macro drivers, all of which inform portfolio construction and position sizing. We also use various instruments, such as options, in an effort to magnify alpha and minimize downside.

### Team Overview

#### Portfolio Management

Christopher Smith  
Portfolio Manager

#### Investment Results (%)

As of 30 September 2021	Average Annual Total Returns						
	QTD	YTD	1 Yr	3 Yr	5 Yr	10 Yr	Inception
Class I USD—Inception: 06 Dec 2018	2.21	11.44	26.90	—	—	—	23.26

**Past performance does not guarantee and is not a reliable indicator of future results.** Performance is NAV to NAV, including reinvestment of dividends and capital gains, if any, and is net of fees and expenses, excluding any subscription or redemption charges which may be levied. At the moment, the Fund does not intend to charge subscription or redemption fees. The Fund may be offered in different share classes, which are subject to different fees, expenses and inception dates (which may affect performance), have different minimum investment requirements and are entitled to different services. An investor cannot invest directly in an index.

Performance commentary is provided in relation to the Fund's USD share class.

**Investment Risks:** Investments will rise and fall with market fluctuations and investor capital is at risk. Investors investing in funds denominated in non-local currency should be aware of the risk of currency exchange fluctuations that may cause a loss of principal. These risks, among others, are further described on the last page, which should be read in conjunction with this material.

*"I've learned many things from him [George Soros], but perhaps the most significant is that it's not whether you're right or wrong that's important, but how much money you make when you're right and how much you lose when you're wrong." - Stanley Druckenmiller*

In the third quarter, the Artisan Focus Fund returned 2.2% (as measured by the Investor Class) while the S&P 500® Index returned 0.6%. We are excited about the current portfolio as we head into the fourth quarter and into next year. We believe it is composed of companies set up to both grow faster and revise earnings estimates to a far greater degree than the index in 2022 and 2023. We will detail this more in our fourth quarter letter to follow.

In this letter, we'll address a process topic that we find thought-provoking and get asked about frequently—how we think about the interplay of hit rate and payoff within the portfolio and its impacts on our process and culture.

We often hear the batting average (or "hit rate") baseball analogy in an investing context as something along the following lines—"if you can be right more than 50% of the time, you will be successful." This is a casually accepted truism in our industry. Yet in practice, this concept is incomplete at best and flat wrong in many respects. We have given this idea a great deal of attention in creating both our investment and risk management processes, and we take a different stance. Here, we will share some of our thoughts on this topic, as we think there are strong mathematical grounds that demonstrate the benefits of our process and culture—which is much more focused on "payoff" versus "batting average," as Mr. Druckenmiller's quote would suggest. Analytics has changed baseball significantly in the past decade—out with batting average and in with on-base plus slugging, or OPS—why can't it have the same effect on our industry?

We believe our process structured around a focused portfolio requires an exceptionally high level of upfront diligence and ongoing analyst focus. The intent of this approach is to maximize payoff—the profitability of relative winners to relative losers—and optimize sizing, with hit rate a lesser priority. We emphasize broad-based, large, industry-wide inflections that can lead to significant earnings differentiation and sustained changes in valuation multiples. This stands in marked contrast to many widely employed processes that focus on lower concentration and much less tracking error relative to their benchmarks.

Our process leads to higher concentration, and just as important, it leads to far less patience for us to remain flat footed with losing positions! This may contribute to higher turnover, but we believe cutting losers is mathematically just as important as sizing up winners. Forgoing this lever in your process will dilute the payoff ratio significantly, and thus the alpha potential.

In essence, our process places us in an ongoing state of drawing out our true level of differentiation and conviction, which we believe leads to better research and potentially higher payoffs. It's this focus that can be observed in our results—annualized excess returns of 890bps relative to the S&P® 500 Index. We would also like to make note that while a high payout ratio and more concentration require a higher level of focus, diligence and risk management, they do not require elevated volatility or excess overall risk. Again, this is reflected in our track record through a consistently lower standard deviation than the S&P® 500 Index and a downside capture of just 79%.

### Laying Out the Math

Defined below are some simple but important items when deconstructing a portfolio's performance.

$Excess\ Return = Hit\ Rate * Avg.\ Profit\ on\ Winners + (1 - Hit\ Rate) * Avg.\ Losses\ on\ Losers$

$$Hit\ Rate\ \% = \frac{Positions\ that\ Beat\ the\ Benchmark}{Total\ Positions} \quad Payoff = \frac{Profit\ on\ Winners\ Relative\ to\ Index}{Losses\ on\ Losers\ Relative\ to\ Index}$$

Observing the interplay of these variables is revealing. Most portfolios, regardless of how many analysts are on staff, have batting averages around 50%—with the top tier around 55%. This implies a remarkably tight band and sheds light on the natural efficiency of the stock market in aggregate. Payoff levels, in contrast, demonstrate far wider variation from the mean, while having a far greater impact on returns for an unlevered portfolio with reasonable volatility.

For a portfolio with single-name relative volatility of around 10%, the lack of batting average sensitivity that annual returns have is striking and perhaps nonintuitive. In the example laid out in Exhibit 1, an equally weighted portfolio moving from an industry average hit rate (~50%) to best-in-class (~55%) generates just 100bps of additional alpha. On the other hand, improving the payoff from average to top tier has 5X the impact on excess returns.

#### Exhibit 1: Illustrative Sensitivity of Hit Rate and Payoff

Excess return potential by increasing hit rate and payoff percentage

		Payoff %						
		80%	100%	120%	140%	160%	180%	200%
Hit Rate %	50%	-1.0%	0.0%	1.0%	2.0%	3.0%	4.0%	5.0%
	51%	-0.8%	0.2%	1.2%	2.2%	3.3%	4.3%	5.3%
	52%	-0.6%	0.4%	1.4%	2.5%	3.5%	4.6%	5.6%
	53%	-0.5%	0.6%	1.7%	2.7%	3.8%	4.8%	5.9%
	54%	-0.3%	0.8%	1.9%	3.0%	4.0%	5.1%	6.2%
	55%	-0.1%	1.0%	2.1%	3.2%	4.3%	5.4%	6.5%

Excess Returns

Source: Artisan Partners. For illustrative purposes only. Excess returns based on incremental increases in hit rate and payoff percentages. Based on an equally weighted portfolio with average single name volatility of 10% from the benchmark.

#### Exhibit 2: Illustrative Impact of Moving from Average to Top Tier

Improving Payoff % to best-in-class would increase excess returns 5X more than improving to best-in-class Hit Rate %

Source: Artisan Partners. For illustrative purposes only. Excess returns for hit rate based on moving from average (50%) to top tier (55%). Excess returns for payoff percentage based on moving from 100% to 200%. Based on an equally weighted portfolio with average single name volatility of 10% from the benchmark.

Because of this, we incorporate an unemotional and ruthless approach that recognizes some simple truths. First, we are going to be wrong often. The unemotional acceptance of this fact has a profound impact on our process and intellectual honesty. We believe we can significantly amplify our returns by recognizing this early on. While seemingly simple, executing this effectively requires a unique, analytically disciplined operating culture of humbleness and self-awareness that we've worked very hard to build and maintain. Second, we are also going to be right a lot, and maximizing these instances with aggressive sizing can generate substantial alpha. The combination of these factors is a powerful driver of excess returns in a portfolio, far more powerful than what most focus on: hit rate.

With this as context, let's also consider some common investment process descriptions of our peers and some constraints that exist within the industry. We frequently hear industry lingo such as knowing companies or management teams better than everyone else—we view this as a requirement of the job and not an edge. Another is buying stocks with significant upside to intrinsic value—again a requirement of the job and not an edge. Others include low turnover, balanced sector exposure to benchmark, lower tracking error, etc. The list goes on and on.

Consider these statements in the context of the simple analysis already laid out. Empirically, batting average is highly likely to be around 50%, so the drive toward very low turnover handcuffs the manager's ability to aggressively cut losing positions, which depresses the payoff ratio. At the same time, the drive for balance and fear of volatility further lead to under capitalization on the best ideas, yet again pressuring the payoff ratio.

Indeed, these common constraints remove many things that appear to us mandatory for success. It is no surprise in this analysis that if all these rules are followed, even an army of the best analysts is likely to outperform the benchmark only slightly before fees. Paradoxically, these concepts in total for the most part have led to mediocrity in the industry. Said another way, if a team does great research (knows their companies well), has very low turnover and/or low tracking error (balanced sectors, less concentration, etc.) and even achieves an above average hit rate, its excess returns will probably be somewhere around the equity fund average fee level of 80bps. It's just math.

We view this as strong evidence that we are deploying our most scarce resource well, which we have often said is our time. Our process aims our time and attention naturally toward the largest investments, but also the investments that are not working. We are constantly assessing if we are wrong. We have systems in place to alert us to negative revisions in our fundamental analysis, which allows us to reduce risks earlier in areas where there is adverse "change." We know what matters for an investment, and we track those areas intensely.

Maximizing payoff permeates through our process and our ability to build an all-weather portfolio. First, we are extremely focused on not losing money and are continuously probing conviction levels on losing positions, especially when they are large but even when they are small. It has been very rare so far for us to suffer a significant loss on a single position. The systematic structure of our process helps us do this as it aims to remove as much emotion as possible—earnings differentiation and expected outcome are research outputs. As our research outputs change our perspective changes, and our process leaves little room for us to defend a losing

position without sound analytic reasoning. Second, we aim to employ a symmetric process. We are constantly assessing the sizing of winning positions as our thesis plays out, as well as whether we are maximizing our research. Ultimately, all aspects of our process—from our culture to our day-to-day research—are geared towards this outcome, and we are happy that our results reflect what we fundamentally believe drives investment results.

Importantly, if we maintain focus on analytical differentiation and employ a robust risk management process, there is no mandatory tradeoff that results in elevated risk. We have produced positive excess returns (Exhibit 3) with our approach of elevated concentration, high sector active weightings and active portfolio management, without exhibiting greater volatility or drawdowns.

### Exhibit 3: Summary Risk Statistics

As of 30 September 2021

	Annualized Return ITD	Std Dev	Sharpe Ratio	Max Drawdown	Beta
Artisan US Focus Fund (Class I USD)	23.26%	17.0%	1.6	-14.6%	0.8
S&P 500® Index	20.23%	18.4%	1.0	-19.6%	0.0

Source: Antero Peak Group/S&P/MSCI. Inception: 6 Dec 2018. Risk and return statistics are based on monthly data from 1 Dec 2018 to 30 Sep 2021. **Past performance does not guarantee and is not a reliable indicator of future results.**

We think recognition of this simple framework has served us well and has had a big impact on our operating culture that we continue to refine and evolve.

### Summary

As we said last quarter, economic growth is decelerating, the stock picking environment is improving, and we expect to see our portfolio materially outpace and out earn the S&P 500® Index on fundamental metrics. In the context of the Stanley Druckenmiller statement we referenced, we aim to maximize our research efforts through an obsessive operating culture of optimizing the payoff ratio, which we think is one of our most effective tools to generate high risk-adjusted alpha. Our underlying process remains unchanged, and we remain committed to finding inflection points that can lead to accelerations in revenue and earnings. We also seek differentiation vs. consensus and thesis duration that can lead to more sustainable ROIC growth and multiple expansion. We think this combination of rigor and culture gives us a high probability of achieving investment success.

**Investment Risks:** A non-diversified portfolio may invest a larger portion of assets in securities of a smaller number of issuers and performance of a single issuer may affect overall portfolio performance greater than in a diversified portfolio. The portfolio's use of derivative instruments may create additional leverage and involve risks different from, or greater than, the risks associated with investing in more traditional investments. High portfolio turnover may adversely affect returns due to increased transaction costs and creation of additional tax consequences. Securities of small- and medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging markets. These risks, among others, are further described in the Fund Documents.

Further details, including risks, fees and expenses, are set out in the current Prospectus, Supplements and Key Investor Information Documents (KIIDs), which can be obtained by calling +44 (0) 20 7766 7130 or visiting [www.artisanpartnersglobal.com](http://www.artisanpartnersglobal.com). Read carefully before investing.

This summary represents the views of the portfolio managers as of 30 Sep 2021. Those views may change, and the Fund disclaims any obligation to advise investors of such changes. For the purpose of determining the Fund's holdings, securities of the same issuer are aggregated to determine the weight in the Fund. Securities named in the Commentary, but not listed here are not held in the Fund as of the date of this report. Portfolio holdings are subject to change without notice and are not intended as recommendations of individual securities.

Theme classifications are at the sole discretion of the team. Themes and constituents are as of the date indicated and are subject to change. Certain holdings have been reclassified subsequent to initial investment, which has impacted theme performance during the period. Portfolio sector classifications are defined by the investment team based on GICS.

The Global Industry Classification Standard (GICS<sup>®</sup>) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's Financial Services, LLC (S&P). Neither MSCI, S&P, their affiliates, nor any of their third party providers ("GICS Parties") makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including warranties of accuracy, completeness, merchantability and fitness for a particular purpose. The GICS Parties shall not have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of such damages.

Attribution is used to evaluate the investment management decisions which affected the portfolio's performance when compared to a benchmark index. Attribution and Contribution are not exact, but should be considered an approximation of the relative contribution of each of the factors considered.

Portfolio statistics are obtained from various data sources and intended to provide a general view of the portfolio, or Index, at a point in time. Artisan Partners excludes outliers when calculating portfolio characteristics and may use data from a related security to calculate statistics if information is unavailable for a particular security. **Discounted cash flow (DCF)** is a valuation method used to estimate the value of an investment based on its expected future cash flows. **Exposure Pct Assets** represents the portfolio's exposures based on the economic value of investments (including delta-adjusting options exposures). Delta-adjusted options exposure is a measure of the market exposure created by the options and accounts for the sensitivity of options to changes in price of the underlying security. In comparison, measuring the exposure of an option at the market value of the option or notional value can understate or overstate, respectively, the economic exposure and risk. This estimate of portfolio exposure is only an approximation of the portfolio at a point in time.

S&P 500<sup>®</sup> Index measures the performance of 500 US companies focused on the large-cap sector of the market. The index(es) are unmanaged; include net reinvested dividends; do not reflect fees or expenses; and are not available for direct investment.

The S&P 500<sup>®</sup> ("Index") is a product of S&P Dow Jones Indices LLC ("S&P DJI") and/or its affiliates and has been licensed for use. Copyright © 2021 S&P Dow Jones Indices LLC, a division of S&P Global, Inc. All rights reserved. Redistribution or reproduction in whole or in part are prohibited without written permission of S&P Dow Jones Indices LLC. S&P<sup>®</sup> is a registered trademark of S&P Global and Dow Jones<sup>®</sup> is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"). None of S&P DJI, Dow Jones, their affiliates or third party licensors makes any representation or warranty, express or implied, as to the ability of any index to accurately represent the asset class or market sector that it purports to represent and none shall have any liability for any errors, omissions, or interruptions of any index or the data included therein.

**Alpha** is a quantitative measure of the volatility of the portfolio relative to a designated index. A positive alpha of 1.0 means the fund has outperformed its designated index by 1%. Correspondingly, a similar negative alpha would indicate an underperformance of 1%. **Beta** is a measure of the volatility of a security or a portfolio in comparison to the market as a whole. **Return on Invested Capital (ROIC)** is a measure of how well a company generates cash flow relative to capital invested in the business. **Sharpe Ratio** is a measure of risk-adjusted return—it is the average return earned in excess of the risk-free rate per unit of volatility or total risk. **Standard Deviation** defines how widely returns varied from an average over a given period of time. Higher deviation represents higher volatility. **Drawdown** is a peak-to-trough decline during a specific period for an investment.

Esta oferta versa sobre valores no inscritos en el registro de valores o en el registro de valores extranjeros que lleva la comisión para el mercado financiero, por lo que tales valores no están sujetos a la fiscalización de ésta; por tratar de valores no inscritos no existe la obligación por parte del emisor de entregar en Chile

información pública respecto de los valores sobre los que versa esta oferta; estos valores no podrán ser objeto de oferta pública mientras no sean inscritos en el registro de valores correspondiente. **Hong Kong:** This material has not been registered by the Registrar of Companies in Hong Kong. The Fund is a collective investment scheme as defined in the Securities and Futures Ordinance of Hong Kong (the "Ordinance") but has not been authorised by the Securities and Futures Commission pursuant to the Ordinance. Accordingly, the shares may only be offered or sold in Hong Kong to persons who are "professional investors" as defined in the Ordinance and any rules made under the Ordinance or in circumstances which are permitted under the Companies (Winding Up and Miscellaneous Provisions) Ordinance of Hong Kong and the Ordinance. In addition, this material may not be issued or possessed for the purposes of issue, whether in Hong Kong or elsewhere, and the shares may not be disposed of to any person unless such person is outside Hong Kong, such person is a "professional investor" as defined in the Ordinance and any rules made under the Ordinance or as otherwise may be permitted by the Ordinance. **Israel:** This material has not been approved by the Israel Securities Authority and will only be distributed to Israeli residents in a manner that will not constitute "an offer to the public" under sections 15 and 15a of the Israel Securities Law, 5728-1968 (the Securities Law) or section 25 of the Joint Investment Trusts Law, 5754-1994, as applicable. The Fund is being offered to a limited number of investors and/or those categories of investors listed in the First Addendum to the Securities Law (Sophisticated Investors). This material may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Any offeree who purchases shares of a Fund is purchasing such Fund for its own benefit and account and not with the aim or intention of distributing or offering such Fund to other parties (other than, in the case of an offeree which is a Sophisticated Investor by virtue of it being a banking corporation, portfolio manager or member of the Tel-Aviv Stock Exchange, as defined in the Addendum, where such offeree is purchasing Fund for another party which is a Sophisticated Investor). Nothing in this material should be considered investment advice or investment marketing as defined in the Regulation of Investment Counselling, Investment Marketing and Portfolio Management Law, 5755-1995 (the Investment Advice Law). Investors are encouraged to seek competent investment counselling from a locally licensed investment counsel prior to making the investment. Artisan Partners does not hold a licence under the Investment Advice Law, nor does it carry the insurance as required of a licensee thereunder. **Jersey:** This material relates to a private placement and does not constitute an offer to the public in Jersey to subscribe for the Fund offered hereby. No regulatory approval has been sought to the offer in Jersey and it must be distinctly understood that the Jersey Financial Services Commission does not accept any responsibility for the financial soundness of or any representations made in connection with the Fund. The offer of shares is personal to the person to whom this material is being delivered by or on behalf of the Fund, and a subscription for the shares will only be accepted from such person. The material may not be reproduced or used for any other purpose. **Mexico:** The Fund has not been and will not be registered with the National Registry of Securities, maintained by the Mexican National Banking and Securities Commission and, as a result, may not be offered or sold publicly in Mexico. The Fund and any underwriter or purchaser may offer and sell the Fund in Mexico on a private placement basis to Institutional and Accredited Investors pursuant to Article 8 of the Mexican Securities Market Law. **New Zealand:** This material is not a product disclosure statement for the purposes of the Financial Markets Conduct Act 2013 (the FMCA) and does not contain all the information typically included in such offering documentation. This offer of shares in the Fund does not constitute "regulated offer" for the purposes of the FMCA and, accordingly, there is neither a product disclosure statement nor a register entry available in respect of the offer. Shares in the Fund may only be offered in New Zealand in accordance with the FMCA and the Financial Markets Conduct Regulations 2014. **Oman:** The information contained in this material neither constitutes a public offer of securities in the Sultanate of Oman as contemplated by the Commercial Companies Law of Oman (Royal Decree 4/74) or the Capital Market Law of Oman (Royal Decree 80/98), nor does it constitute an offer to sell, or the solicitation of any offer to buy Non-Omani securities in the Sultanate of Oman as contemplated by Article 139 of the Executive Regulations to the Capital Market Law (issued by Decision No.1/2009). Additionally, this private placement memorandum is not intended to lead to the conclusion of any contract of whatsoever nature within the territory of the Sultanate of Oman. **Peru:** The Fund has not been registered before the Superintendencia del Mercado de Valores (SMV) and is therefore being placed by means of a private offer. SMV has not reviewed the information provided to the investor. This material is only for the exclusive use of institutional investors in Peru and is not for public distribution. **Qatar:** The Funds are only being offered to a limited number of investors who are willing and able to conduct an independent investigation of the risks involved in an investment in such Funds. This material does not constitute an offer to the public and is for the use only of the named addressee and should not be given or shown to any other person (other than employees, agents or consultants in connection with the addressee's consideration thereof). The Funds have not been and will not be registered with the Qatar Central Bank or under any laws of the State of Qatar. No transaction will be concluded in your jurisdiction and any inquiries regarding the Funds should be made to Artisan Partners. **Singapore:** Artisan Partners Global Funds plc is currently entered into the Monetary Authority of Singapore's (MAS) List of Restricted Schemes. This document has not been registered as a prospectus with the MAS. Accordingly, this and any other material in connection with the offer or sale, or invitation for subscription or purchase, of shares of the sub-funds of Artisan Partners Global Funds plc may not be circulated or distributed, nor may shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor under Section 304 of the Securities and Futures Act, Chapter 289 of Singapore (SFA) or (ii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. **Switzerland:** The Prospectus, the Key Investor Information Document(s), the Articles of Association of the Company and the latest annual and semi-annual reports can be obtained free of charge from the representative in Switzerland, State Street Bank GmbH, Munich, Zurich Branch, Beethovenstrasse 19, CH-8002 Zurich, Switzerland. The place of performance and jurisdiction is at the registered office of State Street Bank GmbH. State Street Bank GmbH is also the paying agent of the Company. **United Arab Emirates (Non-DIFC):** This material does not constitute, and is not intended to constitute, a public offer of securities in the United Arab Emirates and accordingly should not be construed as such. The shares are only being offered to a limited number of exempt investors in the UAE who fall under one of the following categories of non-natural qualified investors: (1) an investor which is able to manage its investments on its own, namely: (a) the federal government, local governments, government entities and authorities or companies wholly-owned by any such entities; (b) international entities and organisations; or (c) a person licensed to carry out a commercial activity in the UAE, provided that investment is one of the objects of such person; or (2) an investor who is represented by an investment manager licensed by the SCA. The shares have not been approved by or licensed or registered with the UAE Central Bank, the Securities and Commodities Authority, the Dubai Financial Services Authority, the Financial Services Regulatory Authority or any other relevant licensing authorities or governmental agencies in the UAE.
